## After your blood transfusion

## **Outpatient instructions**

You may resume your normal activities 4 to 6 hours after your blood transfusion. Reactions to a blood transfusion may be delayed.

- If you develop fever with or without chills in the next 48 hours, you could be experiencing a delayed transfusion reaction.
- If you notice dark urine, yellow skin, or feel unusually tired during the next 2 weeks, you could be experiencing a delayed transfusion reaction

If you think you are experiencing a delayed transfusion reaction, call a member of your health care team immediately.
